

I am alone in my room, I can't go out and I would like to have a baby

In 2030 globalization and technologies made long-distance relationships possible, helping couples to live without seeing each other. Alea is a kit designed for couples who want to have a child, safely and without sacrificing the romantic and sensory atmosphere. The experience of Alea focuses on making sure the process of conception from the most intimate phase to the experiential one, recreating the atmosphere and feelings of the partner with touch sensors connected at a distance in real time.

STORYTELLING

Alea components

_Suit

Haptic neoprene suit transmits sensations through electrostimulation with tactile sensors and actuators.

_Dildo and Male masturbator

These objects created in plastic and silicon are the most technical part of the experience with capsules to be inserted in both for fertilization.

_Capsule Box

The capsule box is contained only in the men's kit and serves to store and maintain the sperm to be sent to the partner.

_Controller

The controller gives a romantic atmosphere to the experience. Is a speaker, a diffuser and a microphone to communicate with the partner.
